ROOM UNIT DISPLAY

DESCRIPTIONS OF SYMBOLS ON SCREEN

Event display symbols

Symbol	Description
	Warning. If an error occurs in the heating controller, the room unit will beep twice, and the symbol will flash. The symbol will stop flashing as soon as the error has been removed. The symbol disappears as soon as the error has been read.
	Indicates whether the safety function of the controller is on. If a protective function occurs on the controller, the room unit will beep once, and the symbol will start flashing. The symbol will stop flashing as soon as the error has been removed. The symbol disappears as soon as the error has been read.
	Notification about the heat tank. If accumulator temperature does not meet the heating needs, the room unit make two short beeps, and the symbol starts flashing. If the accumulator temperature falls below the minimum temperature, the room unit make three short beeps, and the symbol will light up.

	Log or wood chip boiler notification. If the boiler temperature does not meet the heating needs, the room unit will make two short beeps, and the symbol will start flashing. If the boiler temperature falls below the minimum temperature, the room unit will make three short beeps, and the symbol will light up.
	Information about the pellet store. If the pellet storage room is nearly empty or empty, the room unit will make three short beeps, and the symbol will start flashing.
	Key lock.
	Manual intervention in controller operation.
	Menu for data and settings.
	Manual switch-off of liquid fuel boiler.
	Room unit address (1-first or 2-second).

Sound signalling of warnings and notifications will be repeated at 20:00 if warnings or notifications are still present. Parameters P1.8 and P1.9 define which events will be displayed visually and which by sound.

VERWIJDERING VAN OUDE ELEKTRISCHE EN ELEKTRONISCHE APPARATEN

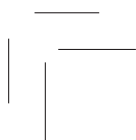

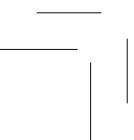

Verwijdering van oude elektrische en elektronische apparaten (van toepassing op de EU-lidstaten en andere Europese landen met gescheiden inzamelingsysteem).

Dit symbool op een product of op de verpakking wijst erop dat het niet mag worden behandeld als huishoudelijk afval. Het moet naar een inzamelingspunt voor elektrische en elektronische apparaten (WEEE) worden gebracht. De juiste afvoer van dit product voorkomt een negatieve impact op het milieu en de gezondheid die wel zou kunnen worden veroorzaakt ingeval van verkeerde afvalbehandeling. De recycling van materiaal vermindert het gebruik van nieuwe grondstoffen. Voor meer informatie over de recycling van dit product kunt u contact opnemen met de bevoegde instanties, de gemeentedienst of de winkel waar u het product hebt gekocht.
